Deep Clean Script for ISAC Management - 2025

Products / Topics : Connect-Secure, Policy Secure

Categories
Pulse

Created Date
Feb 7, 2025 8:53:47 AM

Last Modified Date
Aug 27, 2025 9:41:11 AM

How To
The ISAC Deep Clean Script is designed to perform a thorough removal of ISAC and Pulse Secure components from a Windows system. It runs in silent mode, ensuring no user intervention or interface is required during execution.

The script can be deployed via SCCM or Intune. It can also be used during the ISAC (Ivanti Secure Access Client) upgrade or downgrade process for removing any leftover components or configurations from previous versions, it ensures a clean environment for the new version to be installed.

Note: This script is not supported on systems configured with the Japanese language.

Version History:

v1.1 (August 7, 2025): General improvements and enhancements

To verify the authenticity and integrity of the script file, use the following hash values

File Name	MD5 Hash	SHA256 Hash
ISACDeepCleanScript Silent_Signed_v1.1.ps1	dab59908646a8484 0eea239dde0a4776	bdcbf08ae81b2b89251ad2c8288a867c183902e66c14bbbb1e6fd523ff8 9ef20

How To - Answer
How to Execute from PowerShell via SCCM/Intune:

```
PowerShell -ExecutionPolicy <RemoteSigned/AllSigned> -WindowStyle Hidden -File ./ISACDeepCleanScriptSilentSigned.ps1
```

How to Execute on End-User PC

Right-click on ISACDeepCleanScriptSilentSigned.ps1 and select 'Run' with PowerShell. If the script fails to run due to a certificate signing issue, open Command Prompt as an administrator and execute the following command:

```
PowerShell Set-ExecutionPolicy RemoteSigned -Scope Process ; ./ISACDeepCleanScriptSilentSigned.ps1
```
